# wattmetrics | Revenue-Grade Metering

WattMetrics offers a powerful and affordable metering solution. We carry the GE kv2c line of smart meters, a global standard for robustness and accuracy. By adding our own proprietary communications solution, we make this level of sophisticated metering affordable even for residential projects.

## Zero Configuration

WattMetrics innovative USB-to-ANSI C18 optical communications adapter makes commissioning a revenue grade system very easy: Plug it in, turn it on.

## Embeddable Data

Interactive charts with live meter data are easily embeddable in any website.

## Unmatched Accuracy

Like all WattMetrics data sources, the readings we record from the GE kv2c are heavily oversampled, ensuring highly accurate data.

## More than kWh

The wealth of data available from WattMetrics via the GE kv2c enables analytics that are simply not possible with simple pulse counter systems.

## Flexible Solution

The WattMetrics platform allows these meters to be used to measure production or demand, single or 3-phase systems.

## Meter Specifications

**Accuracy:** Revenue grade ( $> 0.02\%$ ).

**Rating:** 120 - 480 Volts.

**Form Factor:** Multiple forms available.

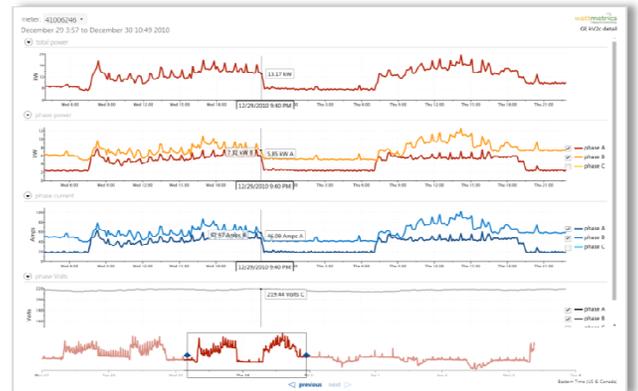

## Recorded Data Points

**Lifetime kWh**

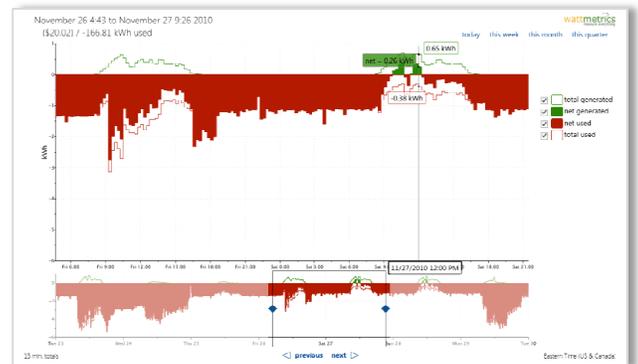

**Instantaneous kW** (phase A, B and C)

**Volts** (phase A, B and C)

**Amps** (phase A, B and C)

3-phase meter data

net production and demand
